ASK ABOUT OUR TRAINING BUNDLES

MINE CLOSURE PLANS

Ontario's regulatory requirements and triggers for a Closure Plan will be reviewed in detail. Participants will understand the "approval" process and information requirements for Closure Plans and Closure Plan Amendments.

NOVEMBER 14, 2019

BASELINE STUDIES
TO SUPPORT PERMITS

Baseline studies are required to support permitting and approvals – they are done to understand the existing environment so that predictions can be made to show how a project may affect the environment in the future.

Through the use of case studies, students will be introduced to scoping, planning & executing baseline studies in Ontario.

JANUARY 23, 2020

ENVIRONMENTAL ASSESSMENTS

The environmental assessment process ensures that governments and public bodies consider potential environmental effects before an infrastructure project begins. This session will review the triggers for a project to become subject to an EA, and the criteria of an Environmental Assessment for a project.

New CEAA rules will be discussed.

MARCH 5, 2020 ◄ **NEW DATE**

CONSULTATION STRATEGIES

Learn best practices for engaging the public, Métis, as well as First Nation communities, with the goal of developing long term relationships for industrial development.
